2018

PROFESSIONAL EXPERIENCE

Game / Level Designer

Vermila Studio

Mar 24 – Present

Sept 22 – Jul23

- Worked on the development of a first-person horror narrative driven shooter in Unreal Engine 5.
- Designed level layouts and blockouts to support gameplay, pacing, and environmental readability.
- Created and maintaining design documentation.
- Designed combat encounters with a focus on tension, flow, and player experience.
- Collaborated closely with different departments to align gameplay needs with visual, narrative and tech direction.

Level Designer

Studio 2934

April 2022 – August 2022

- Worked on the development of an open-world racing game in Unreal Engine 5.
- Lead the design of the game's main level, an open-world environment inspired by Miami Beach.
- Created the initial layout and blockout of the city's core structure.

Game / Level Designer

Lost Criteria Studios

Feb 2019 – Jun 2021

- Owned the design, documentation, and prototyping of several core multiplayer mechanics focused on cooperative gameplay and team-versus-team combat.
- Designed, prototyped, and implemented a randomized loot spawning system based on loot quality areas and item-specific spawn probabilities.
- Designed and iterated on several combat areas within the main level, addressing the challenges of combat readability and player navigation in a fully three-dimensional environment.
